

Alberta Pulse Growers... It's in the PAN

PAN ALERT #23 - August 3, 2004

PLEASE NOTE - Be advised that areas not mentioned in this report may in fact be under disease / pest pressure...

Scouting helps in managing problems. If you see something - please let us know.

Pulse Yield Reports - Please forward any yield information as it becomes available. ie Variety, yield, moisture, location... Thanks

Mycosphaerella blight - **Beiseker**

What are we seeing? - **Beiseker**

Garth Donald of DynAgra in Beiseker reports...

- I have been looking at some field pea crops in the **Beiseker** area and noting that they are only podding at the top of the plant. It is mainly the green variety Espace that seems to be doing this and I was wondering if someone could help me understand why this is happening.
 - I am finding **Mycosphaerella** blight in both the yellow and green varieties.
-

Request - PHOTOS... we are always looking for photos. If you have photos you are willing to share with the Alberta Pulse Growers... we'd love to have them.
